ASSESSMENT COMPLETENESS						
	To ensure that monitoring conducted by coalitions is sufficient to allow for an assessment of all of the water bodies that might be affected by irrigation agriculture within the coalition boundaries.		Long-Term Monitoring Strategy	in Tentative MRP, Oct. 2005, so would require no new language.		
			"At least 20% of the intermediate drainages must be monitored during the first year and the second 20% the second year, etc. Smaller drainages will be monitored if the evaluation of data from the larger drainages or receiving water indicates water quality problems.	in the MRP Order R5-2005-0833, so existing language could be utilized.	The definition of 'intermediate drainage' is not provided.	
			"All major drainages must be part of baseline monitoring;	in the MRP Order R5-2005-0833, so existing language could be utilized.	The definition of major drainages is not provided.	
					Conflicts with language later in the same section "Monitoring sites should not include main-stem waterbodies already on the Clean Water Act section 303(d) listed waterbody", for which the definition of main-stem waterbodies is also not provided.
